

Training in Hair Transplantation

In our Clinica Mediteknia in Gran Canaria (Canary Islands, Spain) we offer 3 types of training: 1) 9-12 month Fellowship accredited by the ISHRS; 2) 1-4 weeks observational training; and 3) 1-3 months observational and hands-on training

1. 9 to 12 months Fellowship accredited by the ISHRS (International Society of Hair Restoration Surgery):

This particular Fellowship has a strong research component, and is specially suited for doctors with a finished residence in Dermatology or any other Surgical specialty. It is also suited for doctors with a strong interest in research or with previous experience in a research lab since the Fellow will be required to spend at least 30% of the time in Hair Research activities in "Mediteknia Skin & Hair Lab". It is recommended that the Fellow validates his/her medical license to practice medicine in Spain.

Benefits of the full Fellowship

- **This fulltime Fellowship is accredited by the ISHRS and will receive a certificate of Fellow in Hair Restoration Surgery issued by the ISHRS.**
- Training will be done under the supervision of Dr. Jimenez, who has a career spanning more than 30 years in the field of Dermatology and Hair Transplantation. The work of Dr. Jimenez has led to international recognition and was awarded the prestigious "Platinum Follicle Award" in 2011.
- The possibility to access the "American Board of Hair Restoration Surgery" examination upon completion of the Fellowship.
- Attending in more than 120 cases of Hair Restoration surgery during the course of the year.
- **Scientific publications:** As 30% of the time will be spent performing clinical or lab research, the Fellow can have the chance to get publications in internationally recognized scientific journals.

The application form and more information about this program can be obtained in the following link <https://ishrs.org/ishrs-approved-fellowship-training-directors/>

The filled application has to be sent to info@clinicadelpelo.com

2.- Training Courses (Short Duration):

There are two options for the short duration training program: 1) observational and 2) observational +hands on.

At the end of these short training courses a **certificate of completing the course will be issued by Mediteknia Clinic**

2.1.-Observational training program (1 to 4 weeks):

This training includes the following:

- **Assisting to 3-5 hair transplants during the week.**
- **Observation of all steps of the transplant procedure: extraction of follicular units and implantation of the grafts.**
- **Learning how to load implanters (individualized instruction).**
- **Assessing the donor area and how to plan the transplantation into the recipient area.**

No hands-on is possible with this training.

2.2.-Observational + "hands-on" training program (1 to 3 months):

Includes the training program covered in 2.1. in addition to hands-on training.

This training program will provide the trainee the opportunity to perform hands-on follicular unit extractions under Dr. Jimenez supervision. The first two weeks will be purely observational and this will be followed by supervised "hands-on" training after the third week.

The recommended period for this kind of training is 1 to 3 months.
